

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name hedden3rd-floorsouth

Your Name Yat Yin Hui (huiy13)

Your Team Member's Name Jerry Wu (wu744)

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - I worked on iteration 0,1a,2a,3 and part of the bonus.
2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Jerry worked on iteration 1b,2b and part of bonus.
3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

This is an interesting experience as I have never worked with other people in coding. I have realised that the importance of commenting and communicating with your partner about the idea and workflow of the code. If I have more time for this project, I would like to develop more new features based on the current mini features we have. I would like to also create more methods in the player class to organise the repeated structure in the move player methods. Personally, I like to code by my own as it is more flexible and comfortable. However, collaborating with others aren't as bad as I thought it would be.
